Database Documentation for Nexus Project 2

1. Overview

This document provides an overview of the `nexus` database and details about the `user_form` table. The backend of the project is developed using PHP, and the database is managed using phpMyAdmin on a localhost server.

2. Database Schema

Database Name: `nexus`

Table Name: `user_form`

Description: The `user_form` table stores user-submitted form data.

3. Table Structure

Table Name: `**user_form**`

Column Name	Data Type	Description
name	VARCHAR(30)	User's name
email	VARCHAR(30)	User's email address
phone	INT(20)	User's phone number
password	VARCHAR(15)	User's password

4. Sample Data

Example of the table structure with sample data:

Name	Email	Phone	Password
Karishma	karishma@gmail.com	2147483647	karishma
khulfiya khulfi	khulfiya@gmail.com	43346346	kulfia
